

MOBILE APPS

User Interfaces - User Software

The Equinox app and accompanying in-wall touchscreens epitomize the ideal user experience by providing a remarkably simple interface for managing luxury environments. With multiple system widgets available and three navigation levels - the live dashboard, full-screen view and edit mode, Equinox can dynamically personalize each iPhone, iPad and iPod or mobile Android device for any profile such as a person, area, function or time of day.

Download the app from the iTunes Store or the Android Marketplace, install it on the desired tablet and let the app read the controller system information and build the widgets. Next, configure the different widgets for each tablet and each profile.

Equinox apps for mobiles and tablets follow a simple licensing model. They are enabled on a system through the installation of Equinox 73 touchscreens or purchasing and installing an Equinox App SD license card. Every 73 on a project enables one mobile or tablet device. If you need more tablet or mobile apps than you have 73s, you can purchase the appropriate quantity license SD card, insert it in the InFusion controller and leave it.

AVAILABLE WIDGETS

- Lighting
- Video
- Weather
- Scenes
- Climate
- Security
- Audio
- Cameras
- Home Theater

Product Highlights

- Downloadable from the iTunes App Store and Android Marketplace
