

# CASE STUDY

TSENG RESIDENCE  
ZHONGLI DISTRICT,  
TAOYUAN CITY, TAIWAN

2020

Binnendijk 40  
9130 Beveren, Belgium

## ABOUT

**Application Type:** Residential  
**Location:** Zhongli District, Taoyuan City, Taiwan  
**Owner:** Mr. Tseng - Interior Designer  
**Project Management:**  
**Innovated Integration Co., Ltd**  
 Charles Lai , General Manager  
 Pierre Huang, Project Engineer

## CHALLENGE

This is one beautiful residence whose refined and essential design draws on an almost minimalist living space approach while meeting realistic functionality concerns for the homeowner. The interior designer and owner of this 75 sqm apartment was looking for a reliable home automation installation with not only new but really innovative features, he thus started to explore our smart solutions for his new home.

## SOLUTION

MyHOME attractive design and feel integrated with Vantage flexible features matched all the owner requirements and standards. The desire to have enriched and customizable functions in his home automation system has led the owner to choose MyHOME integrated with Vantage as a perfect combination of powerful logics, conditions and programming, along with all the features made available thanks to MyHOME web server and InFusion controller. By prioritizing comfort and functionality, the owner opted for an integrated home control for lighting, curtains, HVAC, TV sets and setup boxes, including all areas of his apartment: living room, dining/kitchen, bedroom and bathroom. As regards the aesthetics of the installed products, the owner was particularly attracted by the beautiful design of LivingNow.

## BENEFITS

- Comfort & technology combined
- Minimalist & modern design
- Customizable solutions
