Gentse Baan 66/ 204 - 9100
Sint-Niklaas, Belgium

ABOUT

Application Type: Commercial

Location: Gentse Baan 66/ 204 - 9100 Sint-Niklaas, Belgium

Date: June 8th 2021

CHALLENGE

With many of our customers we have already carried out for years great and challenging projects and collected a lot of memories of our previous location in Beveren, known also for its large garden and bright training room. But after the earlier announced reorganization and the move of our inventory to France, the old building wasn't fitting the company needs anymore. The new building needed to offer a modern work environment for customer care, sales, technical and driver development teams. Especially the options for easy testing and support to our customers was a key factor.

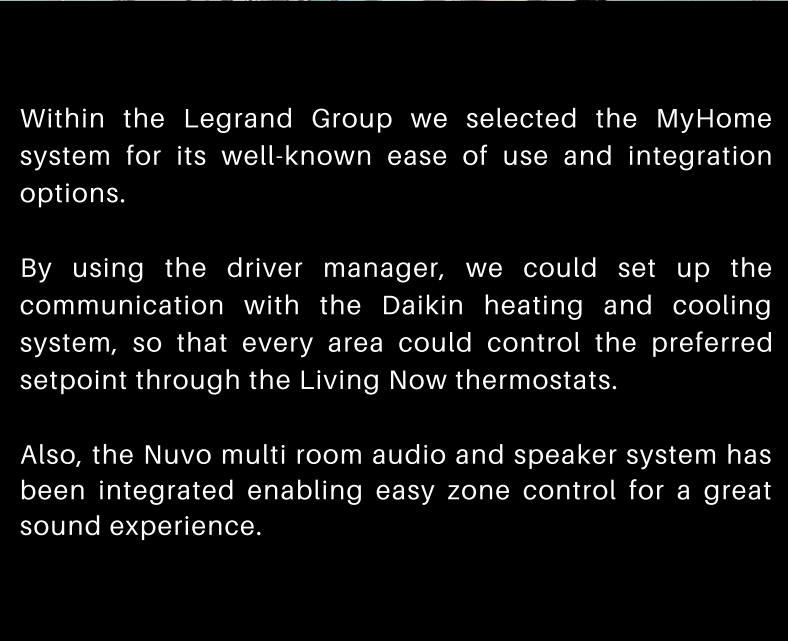

SOLUTION

When we first saw the context in the Business Center - Oude Fruitveiling we immediately identified the options to create an office space to our company needs.

Together with the owner, architect, and project manager the detailed drawings have been prepared fast, and the construction could start.

It was clear from the beginning that the offices of Legrand Integrated Solutions should have all the technologies integrated and easily controllable by default. No stand alone functions were allowed.

Within the Legrand Group we selected the MyHome system for its well-known ease of use and integration options.

By using the driver manager, we could set up the communication with the Daikin heating and cooling system, so that every area could control the preferred setpoint through the Living Now thermostats.

Also, the Nuvo multi room audio and speaker system has been integrated enabling easy zone control for a great sound experience.

PRODUCTS

- MyHome** control system
- Living Now** user interfaces and wiring devices
- Nuvo multi room audio system (integrated) and in ceiling speakers
- Daikin** HVAC system (integrated)
- Legrand** power and breakers board, UPS, rack and patch panels, cable trays (in ceiling & under floor) and floor boxes (power, network, hdmi)
- Luxul** network, Sanus TV mount

BENEFITS

- Light and modern look and feel
- Excellent 'working together options'
- Legrand automated & integrated buildings
