

# Nuvo Speaker Clearance FAQ

## Which models does this apply to?

Home Theater - LCR models and Angled in-ceiling models

Outdoor - All 5-1/4" models

Both groups - related accessories

The clearance flyer details each model and pricing

## Why are these models on clearance?

In a very competitive environment, these models have not been as successful as we need them to be.

We can all be more successful with the remaining models with the ability focus more on those.

## How long will the discontinued models be available?

That depends on the increase in business from the great clearance pricing, but we expect that we will have stock on most of these models through the end of the year.

## What models will stay in the line?

All standard in-ceiling models will remain.

All standard in-wall models will remain.

All 6-1/2" outdoor models and the Landscape system will remain.

All in-room powered subwoofers will remain.

All in-wall subwoofers and amplifiers will remain.
