

Vantage Voice Control

 legrand

legrand.us/vantage

Vantage Voice delivers a convenient, hands-free way for users to control their Vantage InFusion system from Amazon Alexa. Enhance the luxury lighting control experience by easily integrating Vantage into Alexa, allowing just the user's voice to control and manage their environment. The Alexa-enabled tasks can be further customized in the Alexa app, so they can synergize with existing Alexa setup configurations.

Alexa can control up to 60 tasks per Vantage system

- Voice execution simulates a button press to facilitate the completion of tasks
- Alexa-enabled tasks are controlled by voice commands or in the Alexa app

Customization options available to fit customer preferences

- Create Routines to simplify scene commands, such as grouping multiple actions into one command or shortening command prompts
- Add or remove scenes to a room or device group

Widespread compatibility

- Compatible with IC-II, IC-DIN-II, or IC-DIN-II-LITE InFusion Controllers running Design Center 4.8 or greater
- Compatible with Amazon Echo devices and Alexa app control via iOS or Android
