The Legrand group

A global player

As a global leader, the Legrand Group is well aware of how the scope of its offering, its technological expertise, its international presence, and the power of its brands can support a world of improvement.

The Group embraces this responsibility by putting its words into action every day through a continuous search for ways of improving its products, its processes, and every decision it makes.

#LegrandImprovingLives

The Legrand Group transforms the spaces where people live, work, and meet. It provides simple, innovative, and sustainable solutions and services, and tailors them to numerous applications. It strives to brighten up the lives of everybody in its wide business ecosystem, as well as society as a whole.

TOGETHER ACTING FOR A SUSTAINABLE FUTURE

OUR 5 COMMITMENTS

Integrated in our strategy, our 5 CSR commitments are structured around five areas of action which include the most material challenges for the Group

DIVERSITY & INCLUSION	CLIMATE CHANGE	CIRCULAR ECONOMY	SERVING OUR CUSTOMERS	RESPONSIBLE BUSINESS
For Legrand, diversity and inclusion are a source of sustainable performance and prosperity	Reducing the Group's carbon footprint is a key priority in order to fight climate change.	Adopting the principles of a circular economy into Legrand's activities is at the heart of the Group's sustainable development approach.	Putting our customers at the heart of our concerns is essential if we are to meet their expectations.	Listening to and respecting stakeholders constitutes the foundation of Legrand's development model.
THE LEGRAND GROUP IS COMMITTED TO ACHIEVE	THE LEGRAND GROUP IS COMMITTED TO BECOMING	THE LEGRAND GROUP IS COMMITTED TO ELIMINATE	THE LEGRAND GROUP ENABLES ITS CUSTOMERS TO AVOID	THE LEGRAND GROUP IS COMMITTED TO REACH
1/3	NET ZERO	100%	70^{MT} OF CO₂	80%
of key management positions (Hay Grade 20+) held by women by 2030	by 2050	of the plastic in its packaging by 2030	emissions through its energy efficiency solutions between 2020 and 2030	of our sales with eco-responsible solutions by 2030 (through their use as part of our energy efficiency solutions, or covered by a Product Sustainability Profile - PSP)

Day after day, we strive to help build a more sustainable future. This conviction has been at the heart of Legrand Group's strategy for nearly 20 years, guiding our organisation, governance, offerings, and relationships with our ecosystem, while driving every employee and creating opportunities aligned with our core business.

Brought to life through **We Make It Happen**, a portrait series highlighting the everyday actions of employees behind the Group's CSR commitments.

It is also a way to bring to life our raison d'être, "improving lives"

WE MAKE IT HAPPEN

<i>At Legrand, we firmly believe that the more inclusive a company is, the more productive it is.</i>	<i>It is a very challenging and energizing job working on reducing environmental impacts for the upcoming generations.</i>	<i>At Legrand, I work every day to reduce the environmental impact of our products.</i>	<i>Putting the customer at the heart of our daily decisions is a major commitment at Legrand.</i>	<i>At Legrand, I work every day to help ensure a safe working environment.</i>

LEGRAND SOLUTIONS FOR **HOSPITALITY**

Legrand has a comprehensive range of integrated solutions for all areas of the hotel to meet every specific requirement.

GUEST ROOMS

In hotel guest rooms, Legrand offers a complete ecosystem of solutions designed to enhance comfort, efficiency, and overall guest experience. The GRMS system enables intelligent management of lighting, climate, access, and room scenarios, optimizing energy consumption while simplifying hotel operations. At the same time, it enhances guest comfort by ensuring a pleasant, intuitive, and seamless in-room experience.

The wide range of wiring devices, pop-up boxes, wireless chargers, and lighting management systems meets guests' needs for connectivity and convenience, blending seamlessly into the room's design. Power outlets and multimedia solutions provide immediate access to energy and personal devices. Thanks to a broad selection of shapes, materials, and finishes, all solutions can be customized to harmonize with any interior concept, helping create a unique and consistent style in every room.

Energy Management System (EMS)

UX One is a comprehensive system designed to optimize the energy efficiency of rooms. Integrating a smart RCU thermostat with occupancy sensors, UX One automatically controls room occupancy, thereby reducing the hotel's electricity consumption and reducing environmental impact. The result is a significant reduction in energy consumption without compromising comfort. UX One is the ideal choice for those seeking efficient, cost-effective, flexible, and easy-to-implement energy management solution. RS485 solution is an alternative wired solution that can address the same energy management requirements.

Guest Room Management Systems (GRMS)

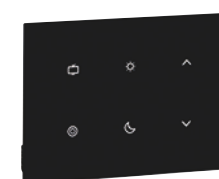

With the Legrand room management system, it is possible to create different scenarios in each room, offering guests a new and unique experience. To ensure comprehensive hotel management, the room management system can be integrated into any Building Management System (BMS) or Property Management System (PMS). The BACnet, KNX and RS485 systems are designed with a strong focus on interoperability, allowing the complete GRMS solution to integrate seamlessly into a broader ecosystem.

Wiring devices

Designing and building a hotel means defining a style that reflects its identity. Legrand offers a wide variety of shapes, materials, and finishes to meet the requirements of interior designers and harmonize with their creative vision. Designs from the various wiring device ranges make it possible to express the desired style and create unique experiences for every guest.

Wireless charger

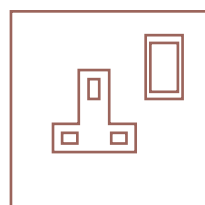

Staying in a hotel should be a new and unique experience for every guest, much more than just a night spent away from home. In addition to GRMS, Legrand provides a comprehensive range of solutions specifically designed for hotel guest rooms: from wiring devices to pop-up boxes, from wireless chargers to lighting management systems, as well as power and multimedia outlets that ensure seamless connectivity for mobile devices.

GUEST ROOMS - Customization

In the most prestigious hotels, guests expect personalised service that will make them feel special in a hotel that is unique.

To reinforce this feeling, Legrand has several brands and exclusive finishes. Depending on what you need and the level you require, products can even be fully tailor made. Legrand strengthens your identity by enabling you to customise your rooms.

LOBBIES AND LOUNGES

To manage the entire building

Modern reception areas focus not only on attractive design, but also on functionality. No longer considered lost spaces, lobbies are now seen as opportunities that offer both private moments and opportunities for social interaction, all while ensuring safety through the presence of emergency lighting.

For the reception area, the integration of Legrand solutions with the hotel's BMS and PMS improves the customer experience and staff productivity. The monitoring software allows you to clearly monitor room status and program access control cards. The business lounge, instead, is a productive workspace, supported by charging and connectivity solutions that meet the needs of today's flexible lifestyles.

Safety and comfort in common areas

Legrand lighting management solutions optimize consumption and energy efficiency in common areas, without compromising safety and comfort.

The extensive range includes stand-alone sensors, KNX sensors, DALI2 sensors, motion detectors, and integrated systems for automatic presence-based lighting control, ensuring lights are turned on only when necessary.

Legrand provides global emergency lighting solutions, compliant with industry standards for all types of buildings, including intelligent solutions that can be integrated into the building management system. Available options also include step lights with motion sensors, combining safety and design.

CONFERENCE AND MEETING ROOMS

CONFERENCE AND MEETING ROOMS

Flexibility and productivity

Legrand's solutions for meeting rooms respond to the current growing trend of making work environments more flexible and productive. Through the solutions provided by its specialists, Legrand offers a wide range of options to equip advanced technology meeting rooms that are perfectly organized and easily adaptable to a wide range of uses.

- Perfect integration with built-in flexibility
- A smarter meeting table
- Support for productivity and optimization of technology

The provision of various connections contribute to working efficiency in conference rooms and meeting rooms. Control and monitoring of lighting, the projection screen and blinds from a single point, as well as the presence of high-performance audio and video connections, will contribute to the success of meetings.

OUTDOORS AND PARKING AREAS

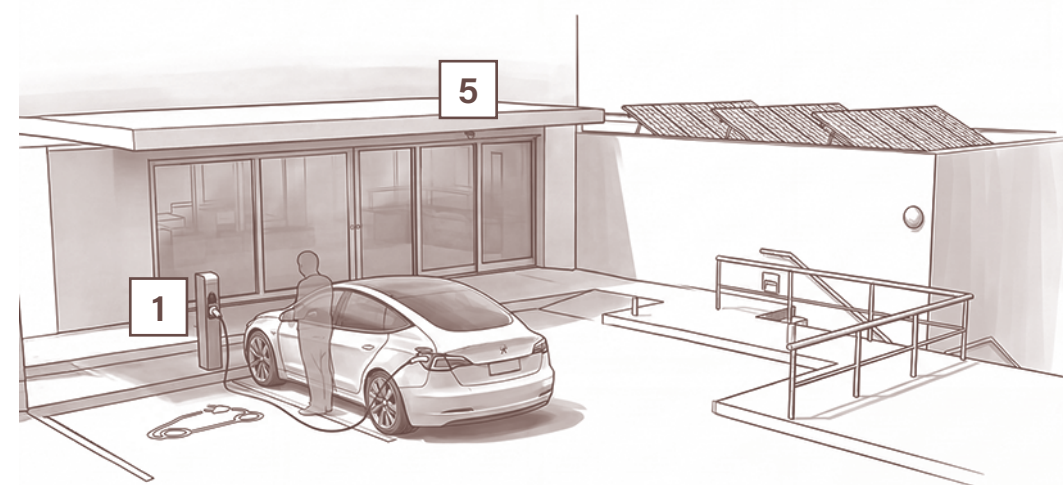

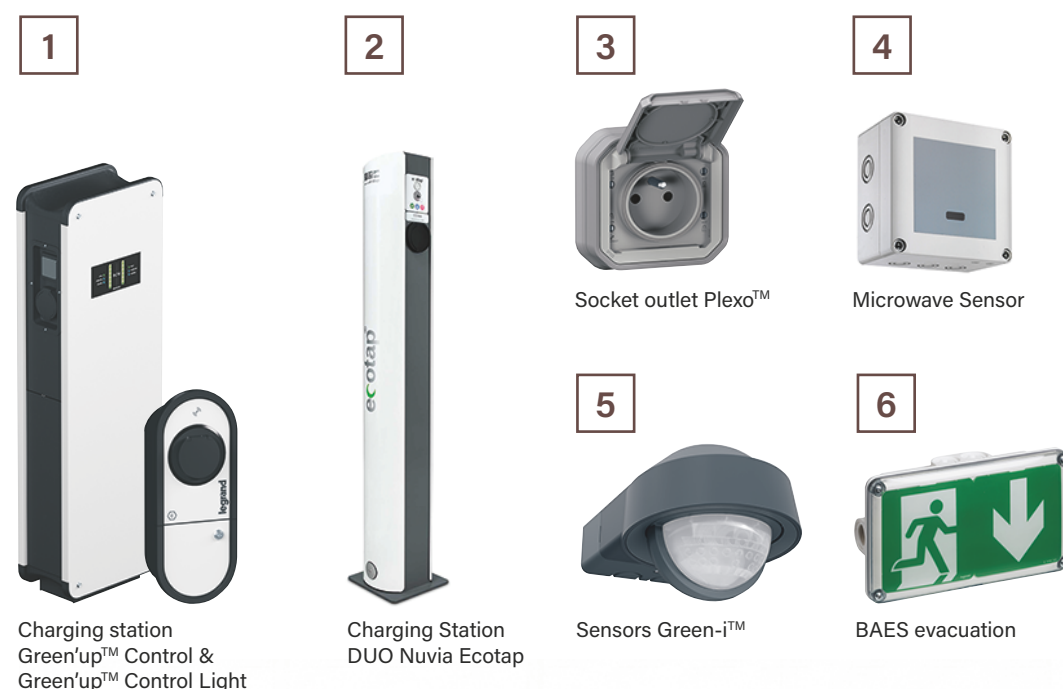

Where services and solutions begins

It is in outdoor areas that customer service begins and where companies can demonstrate their commitment to the environment.

Electric vehicle charging stations must be easy to install and comply with international standards; equipping buildings with easy-to-use plug-in charging stations is a sensible choice from both an economic and environmental standpoint. Legrand offers a wide range of safe charging stations that comply with industry regulations.

To optimize energy efficiency, smart sensors can be integrated to detect presence or movement and automatically adjust the switching on or off of lights, ensuring responsible energy use. Emergency lighting systems are essential in outdoor environments and provide guidance and safety to users at all times.

Weatherproof outdoor power outlets are another element that ensures functionality in outdoor spaces, providing reliable and safe access to power.

OUTDOORS AND PARKING AREAS

TECHNICAL ROOM

Safe energy distribution

The technical room is the heart of the installation; it has to distribute and protect the entire electrical infrastructure of the building. It has also to take account of energy quality and lower energy consumption considerations.

Energy distribution is the foundation of the profitability of the entire building. Legrand power and protection solutions contribute to enhancing profitability by ensuring reliable and safe energy distribution, improving energy quality, and reducing energy consumption.

DATA ROOM

Network performance, security and infrastructure accessibility

The data room is the heart of the area network; its role is to efficient provision and management of data. Legrand provides a wide range to meet network performance, network protection, and accessibility of the infrastructure.

As buildings become smarter and data volumes increase, efficient data delivery and management are becoming even more essential to the day-to-day operations of today's business. Legrand's comprehensive, end-to-end data communication solutions perfectly address the key challenges of digital networks : network performance, security, and infrastructure accessibility.
