# DESIGN CENTER

Software

InFusion Design Center, the software that accompanies the InFusion Controller, is specifically designed to meet the dealers' needs: saving time and increasing the opportunity to make more money. With Vantage software complex lighting scenes are quickly created and third-party systems are easily integrated.

The simple and intuitive nature of Design Center allows Vantage dealers, with minimal training, to provide a complete solution for the homeowner. Managing projects that include lighting, climate, audio, home theater and other sub-systems is easier than ever before. Reports, quick setup wizards, TPT designer and system diagnostic tools are included in Design Center for an efficient approach to project design and commissioning.

Product Highlights

- Simple programming of complex lighting scenes
- Extensive driver library with drag and drop objects
- Project Reports, diagnostic and troubleshooting tools
- Quick Quotes
- Reusable and savable programming
- Customizable libraries
- TPT Designer
